ASSOCIATE PRODUCT MANAGER — AI / COMPUTER VISION PRODUCTS

SUMMARY

AI Product Manager with 3.6+ years owning Computer Vision products for global Fortune 500 brands (Coca-Cola, Nestlé, Unilever, Red Bull), backed by 5 years in QA and requirements roles that built deep stakeholder management and release discipline. Took AI recognition accuracy from ~88% to >95%, improved Cooler Visibility Detection accuracy by 5%, and built continuous AI evaluation frameworks (Golden Datasets, Human-in-the-Loop validation) supporting 40+ enterprise customers across 30+ countries and 20+ international markets. Skilled in translating ambiguous business problems into production-ready AI capabilities — defining requirements, prioritizing backlogs, and partnering across Engineering, Data Science, Operations, and Customer Success.

CORE SKILLS

Product Management: Product Requirements, Roadmapping, Backlog Prioritization, User Stories, Acceptance Criteria, Agile/Scrum, Sprint Planning, Stakeholder Management, Release Management, UAT

AI / ML Product: Computer Vision, AI Evaluations, Human-in-the-Loop (HITL), Golden Datasets, AI Validation, Model Benchmarking, LLM & VLM Fundamentals

Tools & Platforms: Jira, Azure DevOps, Postman, SQL, Claude, Gemini, n8n, Microsoft Excel

PROFESSIONAL EXPERIENCE

Associate Product Manager – Vision Group | Jan 2023 – Present

- **Menu Recognition:** Owned end-to-end product requirements, backlog prioritization, AI evaluations, and Golden Dataset strategy, improving model accuracy from ~88% to >95%.
- **Image Quality Assessment:** Defined business rules and automated validation workflows for blur, poor lighting, and PII exposure, ensuring 100% GDPR-compliant data ingestion across international markets. Introduced image taking guidelines for the mobile app.
- **Image Duplication Detection:** Defined product requirements and validation scenarios to strengthen duplicate-image detection for fraud prevention.
- **Audit Review Workflow:** Shipped an end-to-end workflow managing high-density field data (150+ data points, image assets, SKU/pricing telemetry per submission) with an interactive supervisor portal for real-time overrides, version control, and approvals — cutting report generation time from weeks to real-time.
- **Cooler Visibility Detection:** Led edge-case analysis and restructure detections rules with stakeholder communication, increasing model accuracy by 5%.
- **Prioritized features** using Value-vs-Effort and dependency-driven frameworks; wrote PRDs, functional specifications, user stories, and acceptance criteria for Engineering and AI teams.
- Led backlog refinement, feature scoping, UAT, and release readiness across cross-functional teams, managing stakeholder expectations end-to-end.
- Established AI model certification criteria, Golden Dataset validation, and Human-in-the-Loop evaluation processes to improve production readiness.

Senior QA Engineer — Ness Technologies | Feb 2020 – Jan 2023

- Owned end-to-end testing for Pearson's ePen2 EdTech platform, partnering directly with Product Owners, BAs, and Engineering during backlog refinement and sprint planning.
- Led quarterly regression testing across the full manual test suite, coordinating workload distribution, execution, and defect triage for a team of 4 QA engineers to ensure stable release readiness.
- Drove UAT and requirement validation, catching critical gaps in business requirements early to prevent engineering rework and protect the customer experience.
- Coordinated cross-functionally across major product releases, mapping technical risk, running feature reviews, and resolving live production issues.

QA Engineer — Copper Mobile Pvt. Ltd. | Mar 2018 – Dec 2019

- Developed test scenarios and QA plans for enterprise mobile applications across multiple business domains.
- Partnered with BAs and Engineering during requirement analysis, feature validation, and release testing.
- Supported delivery of business-critical mobile solutions through functional accuracy and release readiness.

EDUCATION

Master of Technology, Wireless Communication — 2016 | Bachelor of Technology, Electronics & Comm. Engineering — 2014
